PANJI

Designed for adventure parks, PANJI is an extremely durable harness with gear loops; it is easy to don, adjust, and use, making the guide or monitor's job easier. The wide connection point and gear loops are designed for excellent compatibility with JOKO lanyards and TRAC pulleys. Identification and marking areas simplify equipment inventory management. The stainless steel DOUBLEBACK buckles and thick webbing optimize durability for intensive indoor and outdoor use, even in salty environments.

Webbing ends are easy to grip for tightening waistbelt and leg loops.

Wide connection point makes it easy to attach several lanyards.

Double gear loop made of thin webbing makes it easy to use with TRAC pulleys and reconnect JOKO lanyards.

Stainless steel DOUBLEBACK buckles for optimal durability.

Short Description Easy-to-use adjustable harness with optimized durability, for adventure parks

Selling Points

- Easy-to-use harness with gear loops, for adventure parks:
 - Wide connection point makes it easy to attach several lanyards
 - Green color-coded connection point and identification markings
 - Double gear loop made of thin webbing makes it easy to use with TRAC trolleys and reconnect JOKO lanyards
- Makes the guide or monitor's job easier:
 - Adjustment options at the waistbelt (up to 120 cm) and leg loops (up to 75 cm), allow the single size to fit a wide range of body sizes
 - Easy to don, with contrasting colors on the waistbelt and leg loops (gray inside, black outside)
 - Quickly and smoothly tighten straps with the DOUBLEBACK buckles
 - Webbing ends are easy to grip for tightening waistbelt and leg loops
 - Identification and marking areas on outside of harness
 - Identification label is durable to make inventory management easier
- Optimal durability:
 - Suited for use in dry or damp areas, and even in salty environments
 - Stainless steel DOUBLEBACK buckles for optimal durability
 - Thick, durable webbing for intensive use while maintaining smooth adjustments
 - Highly durable connection point, with flexible reinforcement and an integrated wear indicator of a different color
 - Elasticated rear straps are adjustable and extremely durable
 - Easy to clean
