CONNECT ADJUST

Designed for climbing and mountaineering, CONNECT ADJUST is a single positioning lanyard that allows users to tether themselves to an anchor. The adjustable arm allows the length to be adapted for easier handling. With an ergonomic shape, the ADJUST rope adjuster allows simple and quick one-handed length selection of the adjustable arm.

The ADJUST rope adjuster's ergonomic shape is easy to manipulate to offer quick, precise adjustment, and it unlocks with a simple turn.

A rubber ring holds the carabiner in position, facilitating clipping.

Single positioning lanyard with adjustable arm is ideal for sport climbing.

Short Description Adjustable single lanyard for climbing and mountaineering

- Selling Points**
- Single positioning lanyard allows you to tether yourself to the station during climbing and mountaineering
 - Adjustable single lanyard:
 - 15 to 95 cm adjustable arm
 - the ADJUST rope adjuster's ergonomics make it easy to manipulate, for quick and precise adjustment of the adjustable arm
 - dynamic rope lanyard, to reduce the force transmitted to the user in the event of a short fall (1)
 - Easy to use:
 - the connector is held in position by a rubber ring, to facilitate clipping
 - one-handed adjustment
 - used with a SPIRIT SCREW-LOCK-type locking carabiner
 - attaches to the belay loop with a simple girth hitch

(1) For use below the anchor point: positioning lanyards do not have an energy absorber. These lanyards must only be used when the potential fall factor is less than 1.

-
